DETAILED ACTION

Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 1-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kitagawa (6,507,443) in view of Kamo (6,154,323).

See the previous action.

Response to Arguments

- 3. In response to applicant's argument that the examiner's conclusion of obviousness is based upon improper hindsight reasoning, it must be recognized that any judgment on obviousness is in a sense necessarily a reconstruction based upon hindsight reasoning. But so long as it takes into account only knowledge which was within the level of ordinary skill at the time the claimed invention was made, and does not include knowledge gleaned only from the applicant's disclosure, such a reconstruction is proper. See *In re McLaughlin*, 443 F.2d 1392, 170 USPQ 209 (CCPA 1971).
- 4. Applicant's arguments do not comply with 37 CFR 1.111(c) because they do not clearly point out the patentable novelty which he or she thinks the claims present in view of the state of the art disclosed by the references cited or the objections made. Further, they do not show how the amendments avoid such references or objections.

Application/Control Number: 10/087,278

Art Unit: 2873

5. In response to applicant's argument that there is no suggestion to combine the references, the examiner recognizes that obviousness can only be established by combining or modifying the teachings of the prior art to produce the claimed invention where there is some teaching. suggestion, or motivation to do so found either in the references themselves or in the knowledge generally available to one of ordinary skill in the art. See In re Fine, 837 F.2d 1071, 5 USPQ2d 1596 (Fed. Cir. 1988) and In re Jones, 958 F.2d 347, 21 USPQ2d 1941 (Fed. Cir. 1992). In this case, using technique "a diffraction efficiency improvement mechanism" for performing the function of color correction is known in the art such as taught by Kamo (see column 5, lines 19-25 for a single lens, for example) to modify the Kitagawa's single lens. Thus the known technique "a diffraction efficiency improvement mechanism" have been motivated a person skilled in the art of lens to modify the lens surface in the Kitagawa's lens device as the same as the applicant does instead of accepting the statement "the proposed combination is based on impermissible use of the claimed invention". The applicant then cited a case law In re Fine, 837 F.2d 1071, 1075, 5 USPQ 2d 1596, 1600 (Fed. Cir. 1988) with argument "The Federal Circuit has held, "It is impermissible to use the claimed invention as an instruction manual or "template" to piece together the teachings of the prior art so that the claimed invention is rendered obvious. This court has previously stated, "[o]ne cannot use hindsight reconstruction to pick and choose among isolated disclosures in the prior art to deprecate the claimed invention."" one type of detector is picked and/or chosen to substitute for another in the type of detector in the prior art system. The single lens of Kitagawa in view of Kamo is nothing relate to pick and choose as argued, but the surface of the prior art's single lens has been modify by the known Art Unit: 2873

technique to provide a lens as claimed in claims 1, 12. Thus, the applicant is not in a correct position to cite such the case law because of no such "pick and choose".

It is agreed with the applicant that "designing a single lens for application with a "strict height requirement" (page 9, lines 14-15). However, the applicant does not point out what is a "strict height requirement" as claimed in claims 1,12. In fact, the single lens as claimed is so broad. Nothing is a "strict height requirement". A "modified" lens having two surface with one surface including a diffraction efficiency improvement mechanism and the other surface perform the function of bending the light ray can be used to reject the claimed invention as discussed in the examiner's action. The results as claimed in claims 2-11,14-20 are inherently included in the "modified" lens of Kitagawa in view of Kamo.

6. NOTE: Since the application is in condition of finality, the newly found reference Kitagawa et al (JP 11-183794) is unnecessary to apply to reject the claims. Kitagawa et al discloses a single lens comprising a first surface 2 for primarily performing a color correction function, the first surface including a diffraction efficiency improvement mechanism 4; and a second surface 3 for primarily performing the light ray bending function.

Conclusion

7. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after

Art Unit: 2873

the end of the THREE-MONTH shortened statutory period, then the shortened statutory period

will expire on the date the advisory action is mailed, and any extension fee pursuant to 37

CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

however, will the statutory period for reply expire later than SIX MONTHS from the mailing

date of this final action.

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Huy Mai whose telephone number is (571) 272-2334. The

examiner can normally be reached on M-F (8:00 a.m.-4:30 p.m.).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Georgia Y. Epps can be reached on (571) 272-2328. The fax phone number for the

organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding

should be directed to the receptionist whose telephone number is (571) 272-1562.
